A. Schema resolution
rules + E5 embeddings column memory
B. Identity and cleaning
composite key fixed date format quality score
C. Grain selection
D/W/M/Q scored missing is not zero leading span only
D. Fold planning
one shared plan h = production h stepped origins
E. Per-fold backtesting
refit per origin in-fold cleaning raw actuals
every candidate model is scored on one identical, leakage-free fold plan
F. Model selection
WAPE-lexicographic rank banded tie-break ensemble adopted only if measured better
G. Conformal intervals
split-conformal relative-error quantiles prequential coverage, Winkler score
H. Reliability report
six weighted evidence factors stated to be not a probability
